

**NOTE:**  
**age:** It is calculated  
from the attribute  
`"date_of_birth"`

**NOTE:**

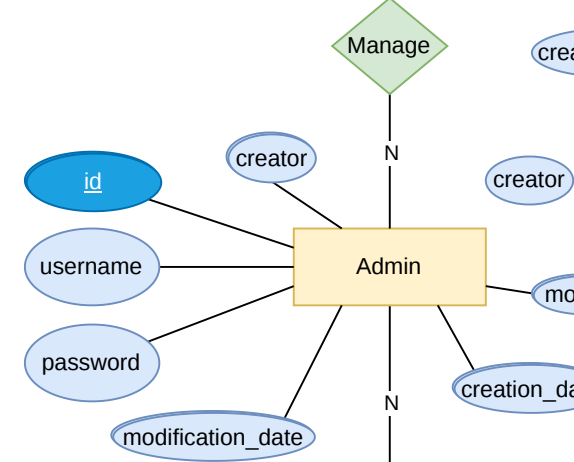

**Inheritance:** Superclass - Subclass Entity

**Justification:** Passenger and driver share attributes but additionally, they are related to different entities.

NOTE:

Every single **entity** (except Parameter and Log) has the attributes **creator**, **creation\_date**, **modifier** and **modification\_date** to help keep a log of everything happening in the database.

NOTE:  
**seat\_availability:** It is calculated  
from the attribute  
"chosen\_capacity"
